OBJECTIVE

B.Tech graduate in AI & Machine Learning with hands-on project experience in deep learning, cloud AI (Azure AI Foundry, Azure OpenAI), RAG pipelines, and conversational AI. Proficient in Python, TensorFlow, PyTorch, and MLflow. Seeking an entry-level AI/ML Engineer role to build scalable AI-powered solutions.

EDUCATION

B.Tech – Artificial Intelligence & Machine Learning Sree Vahini Institute of Science & Technology, Tiruvuru	2021 – 2025	CGPA: 7.65
Intermediate – MPC Surya Junior College, Jangareddygudem	2019 – 2021	92%
SSC Z.P.P. High School, Kamayyapalem	2019	GPA: 9.0

TECHNICAL SKILLS

Languages: Python, SQL, HTML, CSS, Bash	AI / ML: TensorFlow, PyTorch, Scikit-learn, XGBoost, SHAP
Generative AI & LLM: Azure OpenAI (GPT-4o), RAG Pipelines, LangChain, Prompt Engineering	Cloud & MLOps: Azure AI Foundry, Azure AI Search, MLflow, Docker, CI/CD
Frameworks & APIs: Flask, FastAPI, Copilot Studio, Power Automate	Tools: Git, MySQL, Azure DevOps, Dataverse, Pipedream

PROJECTS

Heart Disease Prediction – ML & Deep Learning | Mar–Apr 2025

- Compared ML models (Logistic Regression, Random Forest, XGBoost) and a PyTorch neural network; XGBoost achieved best F1-score of 0.88 on a 303-record patient dataset.
- Applied SMOTE, GridSearchCV, and MLflow tracking; containerized with Docker and exposed via Flask REST API; deployed to Azure ML endpoint (AUC-ROC: 0.91).

Python • PyTorch • XGBoost • MLflow • Docker • Flask • Azure ML

Customer Churn Prediction & Analysis | Jan–Mar 2025

- Built end-to-end ML pipeline on 7,000+ telecom records using Scikit-learn & XGBoost (87% accuracy, 0.85 AUC-ROC); visualized top churn drivers with SHAP plots.
- Packaged as a FastAPI inference module with MLflow versioning, Azure Blob Storage artifacts, and GitHub Actions CI/CD for automated retraining.

Python • Scikit-learn • XGBoost • SHAP • FastAPI • MLflow • CI/CD

Intelligent Document Q&A – Azure AI Foundry | Feb–Mar 2025 | NxtWave

- Built a RAG pipeline integrating GPT-4o with Azure AI Search (hybrid retrieval); achieved groundedness score of 4.3/5; reduced hallucinations by 35% via chain-of-thought prompting.
- Developed LangChain-based PDF ingestion with ada-002 embeddings and semantic ranking; deployed as a Dockerized Flask endpoint with async streaming.
- Evaluated system end-to-end using Azure AI Foundry's evaluation suite (groundedness, relevance, coherence); iterated prompt templates based on metrics to improve answer quality across diverse document types.

Azure AI Foundry • GPT-4o • RAG • LangChain • Vector Search • Docker • Flask

AI Customer Support Chatbot – Copilot Studio | Mar–Apr 2025 | NxtWave

- Built multi-turn conversational AI agent in Copilot Studio with intent recognition, adaptive cards, and SharePoint + Power Automate integration; published to Teams (200+ test users), reducing manual support by ~60%.
- Configured Dataverse to log conversation records and unresolved tickets; monitored agent KPIs (CSAT, escalation rate, session outcomes) via Copilot Studio analytics dashboard and extended chatbot with a custom Azure Function connector for real-time order-status lookups.

Copilot Studio • Power Automate • Azure AD • Dataverse • Teams • SQL

CERTIFICATIONS

- Full Stack Python – SkillDzire & APSCHE (2024)
- MERN Full-Stack – APSCHE & Edubot (2025)
- Data Science & AIML Bootcamp & Hackathon
- Programming Foundations with Python
